

## What is the Big Picture design for learning?

### passion

Each student has a personalised learning plan endorsed by their family and designed around their interests and passions, with links to the curriculum.

Students take courses and work on a variety of projects in areas of personal interest that they design and manage.

Students learn in small groups of 17 known as an 'advisory' where there is a culture of belonging, support and respect.

They also complete practical projects while on internship with an expert mentor in the community, to gain experience in a field of interest.

Students collect evidence of their learning in a portfolio and regularly present their work at a public exhibition to teachers, mentors, peers and family. This is the basis of their assessment throughout school.

The Graduation Portfolio allows young people to showcase skills, knowledge and qualifications to prospective employers, training colleges, universities and investors.
